- k. **Description of Request:** Due to persistent drought conditions, the licensee requests Commission approval of a temporary variance of the minimum flow requirement at streamflow gage YB-292 (Mormon Ravine). The licensee is requesting to decrease the target flow from an instantaneous 5 cubic feet per second (cfs) to 3 cfs, measured as a 24-hour average. The reduced flow is necessary to manage water resources in association with Placer County Water Agency and license required flows. If granted, the variance would last through October 1, 2021, or until adequate precipitation occurs to ensure that inflow equals outflow at the referenced reservoir for at least seven consecutive days, whichever comes later.
